

Regulation and Legislation

- As natural products are regulated at the federal level and CAM practices are regulated at the provincial level, how will the interprofessional team keep up-to-date on both provincial and federal regulations?
- Do any regulations for health professionals represented on the interprofessional team enable or hinder integrative care (such as dispensing of natural products within the agency)? How will any hindering factors be resolved?
- What are the professional boundaries for conventional health providers to perform CAM therapies, and vice versa? What is the acceptable shared zone?
- How will regulatory bodies be involved in the creation of an agency policy with respect to CAM and the standard of reasonable care? (Patterson & Arthur, 2008)
